Artifcial intelligence is the new industrial revolution which is poised to change the world we are living in. With the recent technology advances in data storage, collection and management coupled with analytics and computer processing power, the AI will be complementing and supplementing the human intelligence. In near future, AI will impact in very big way, the way humans live their lives and conduct various activities.

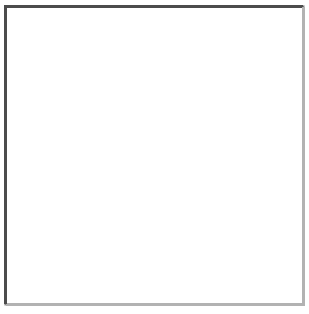

As the Fourth Industrial Revolution unfolds, companies are seeking to harness new and emerging technologies to reach higher levels of efficiency of production and consumption, expand into new markets, and compete on new products for a global consumer base composed increasingly of digital natives.

India, being the second largest populous country with fastest growing economy, will be witnessing the phenomenal growth and spread of AI applications in every feld of country’s economic life. This means in near future and for long time to come there will be many new opportunities coming up for the AI specialists. The main sectors of economy like Banking and Finance, Education, Healthcare, Agriculture, Manufacturing, Transportation are the ones where there are plentiful opportunities to implement innovative AI solutions.

This means that the skills that will be most in demand in 21st century are Artifcial Intelligence, Data Science, Machine Learning, Deep Learning, Analytics, IoT, Robotics Technology, Cloud Computing, Big

Data Analytics, etc. In future, every Professional working in every sector of economy in different roles at different levels will require to possess one of the above skills in order to survive in their jobs. Thus the students whether they are students of Engineering, Science, Commerce, Arts, Economics, Business, Pharmacy by acquiring these 21st century skills will be able to make entry into the good careers and ensure that they survive and thrive in those chosen careers.

Meritorium Knowledge Academy has introduced a course – 'Artifcial Intelligence, Data Science and Analytics' for students and working professionals. This course is blend of 4 courses of Python Programming, Statistics and Mathematics for AI, Advanced Machine Learning and Fundamentals of Deep Learning. It is our mission to make available high end technology training to wider section of Indian society at affordable cost.

JAYANT S. RAMTEKE *(EDP Program – Cornell University, BTech (Mech Engg) - IIT Bombay, PGDM -IIM Calcutta, FRM -GARP USA)*
