Meritorium's Students Testimonials

DR SACHIN SARATE

MBBS, M Tech (Biomedical Engg, IIT Bombay)

I am Dr. Sachin Sarate, MBBS, M Tech Biomedical Engineering from IIT Bombay, working as Assistant Professor in Biomedical Engineering at SSN College of Engineering Chennai.I am working on my PhD in the field of Biomechanics. I attended the certificate course in Applied Artificial Intelligence, Data science and Analytics online from September 2020 to January 2021. It was a great experience learning the basics of programming in Python, Statistics and Mathematics, Advanced Machine learning and Fundamentals of Deep learning. The faculty were very helpful and cleared our doubts during the live sessions as well as offline. They provided us with the standard study Materials and guided us through that. It was a good learning experience which is helping me in my teaching and research.I am grateful to Mr. Jayant Ramteke Sir for creating such an innovative syllabus and executing it with the help of skillful teachers. This course will build the base needed for the challenging market needs of today's competitive environment. MERITORIUM KNOWLEDGE ACADEMY

MR. ANAND BHOSLE,

IT Professional, London

This course gives grand picture on how Data Science & ML stuff works with Supervised, Unsupervised learning & Neural Networks starting from basics to in-depth insights. The course also draws from numerous case studies and applications, so that you'll also learn how to apply learning algorithms to build a model to find out expected outcome in almost all the domains. All the teaching staff is very much knowledgeable, some of them are PHD holders in their area of expertise. I really appreciate the practical advice regarding debugging & algorithm evaluation in Python. Biggest take away for me as a IT professional is amount of attention all faculties brings to methods of evaluating our ML models efficiency and how this correlates with time/effort you Should put into the specific component while applying it into the real world application scenarios. This gave me enough confidence to build a ML model fo my Networking Domain to deal with pain areas. Finally, I think perfect practice makes us perfect…!!! So Perfect Practice is key to Success in Python Programming. Frankly speaking I've never expected much from an online course, but this one is just great from Meritorium Academy…!

MR ATHARVA KULKARNI

Design Engineer at DRDO

I am currently working as a Design Engineer at DRDO. I was a student of Meritorium Academy's first batch Director of Meritorium Academy, for giving me a chance to be a part of this Academy and obviously the beautiful journey towards learning Artificial Intelligence, Data Science and Analytics I'm BTech in Mechanical Engineering. I wanted to learn Al and ML after completing my graduation. In the backdrop of my Mechanical Engg background, initially I was hesitant about joining the Data Science and Analytics course. Jayant Sir helped me come out of my apprehensions and made me comfortable about the course. As the course moved on, I developed interest in the subject matter and I became very enthusiastic about learning new things in the course. The teaching staff is very supportive and have excellent and in-depth knowledge about the particular subject. They teach the topic in-depth, moving from basics to the advance level in very simple manner, so that a student like me from non-computer science background also can comfortably learn the subject. What I got from this class is confidence about coding and in-depth knowledge about DATA SCIENCE AND MACHINE LEARNING which are necessary to become a good data-scientist!

DR ANUP KESHAV POHEKAR,

BAMS from Maharashtra University of Health Science and BE Computer Engineering from Middlesex University London

I am Dr Anup Keshav Pohekar, BAMS from Maharashtra University of Health Science and BE Computer Engineering from Middlesex University London. Data science has emerged as an important and must have skill in today's competitive and ever evolving work space. Empowering and equipping myself with the right skills has always been part of my vision. That is the reason I chose Meritorium Knowledge Academy's Online Certificate Course in Applied Artificial Intelligence, Data Science and Analytics.My experience of this course has been very enriching to me personally as well as to my IT career. Soon after completing this course, I was able to crack an interview for US based Healthcare Analytics IT Company for the post of Business Analyst. This opportunity has really taken my career to the next level. I believe, this is an ideal course for undergraduate students, fresh graduates, graduates aspiring for a job in industry and working professionals from different industry sector with experience ranging from 1 to 30+ years. The practical aspect of this course makes it very interesting. Overall, I want to thank Jayant Ramteke Sir for his continuous guidance throughout the course and even now for my future career prospects. MERITORIUM KNOWLEDGE ACADEMY

Dharmesh Singh

Aircraft Maintenance Engineer, Emirates
Dubai

I’d want to express my gratitude to Meritorium knowledge Academy for assisting me in acquiring insightful data science subject knowledge. I had little prior awareness of this topic, therefore I was unsure of its significance. I was able to understand the classes easily because of the teaching style and the way the various topics were explained. I feel optimistic about moving forward with this knowledge. I want to thank all of the instructors for sharing their knowledge and the director of the academy for organizing such a crucial certificate program that will be very useful for future prospects

Lorem ,

Ispum

Lorem

Snehal

MBA

My name is Snehal. While pursuing M.B.A I joined the two months Data Science course conducted by MCED in Nagpur. It was a day long rigorous training in which we had came across many in-demand tools like Anaconda, statistical data analysis using python, few basic concepts of machine learning etc. After successful completion of this course, during a placement drive in college I got selected as a Research Analyst in the field of financial analytics. The exposure to python and machine learning actually made a strong base of mine and helped me gain more confidence as my skillset got updated. I'm thankful to all the delegates who were involved in making this course successful.

Swapnali Janrao,

Master's in Electrical Engineering

Hi, I am Swapnali Janrao. I have done Master's in Electrical Engineering. Recently, I have completed a 2 months training in Applied Artificial Intelligence, emphasis on Internet of Things and Robotics at Pune, conducted by Meritorium Knowledge Academy in partnership with MCED.This course consisted of training in foundational concepts of statistics, probability theory, Linear Algebra, Exploratory Data Analytics, Logistic regression, Unsupervised learning, etc. All these concepts and algorithms were taught using Python. The second part of the training was in various concepts of IOT. These Iot concepts were taught to us using arduino.The training also included regular lab sessions and hands on projects which gave us an opportunity to do practicals of all the theory conducted in the classes.We also learned the various practical implementation of IoT in real life such as Home automation system, Attendance system, IoT architecture, I2c communication, Building Google Assistance. This knowledge will help me for my career in future. The training enhance my knowledge and skills and I got to learn new programming language like Python. I thank Mr. Jayant Ramteke Sir, the Director of Meritorium Knowledge Academy for providing me such a valuable training opportunity. Thank you.

MERITORIUM
KNOWLEDGE ACADEMY

Meritorium Knowledge Academy, based in Mumbai, is training institution imparting training in the areas of Data Science, Business Analytics, Artificial Intelligence, Machine Learning, Deep Learning, Robotics , IoT.

Upcoming Workshop

- *Data science workshop | Become An In-Demand Data Scientist*
- *Master Business Intelligence using power BI*

Courses

- *Artificial Intelligence, Data Science and Analytics*
- *Master Business Intelligence using power BI*
- *Business Intelligence Workshop*
